

# Respiratory Care

## Veridian Healthcare Advantage

Veridian Healthcare recognizes the need for quality nebulizers in the growing respiratory care market. Our focused offering of reliable compressor and ultrasonic nebulizers serve a wide spectrum of patients. Working closely with our designers and sales team, we have developed two new exclusive pediatric nebulizers.

### Innovative Product Development— Pediatric Compressor Nebulizers

#### Research & Development

Enduring, classic animal characters — kitty cats and dragons — were heartily endorsed by our research team (our own children!) and supported by our intense industry research.

Partnering with a children’s illustrator, we first developed the body-shaped housing and specific features for these whimsical characters. Claw-dia Kitty and Dexter Dragon were born.

#### BUILT-IN CARRYING HANDLE

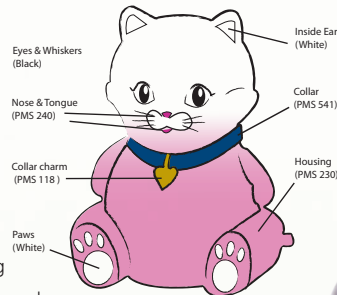

#### Engineering & Testing

With assistance from our factory, our concept became a reality. The nebulizer needed to be compact and lightweight while still housing a strong motor. A built-in nebulizer holder and easily-accessible air filter and power switch were also integral to the design. A deep molded carrying offers a caregiver assistance when giving treatments.

These new designs have been thoroughly tested against our stringent standards throughout the development and production process. All of our nebulizers are quality inspected before shipment.

#### Final Details & Accessories

After our shape was finalized, we added the finishing touches, selecting friendly, bright colors for the body and fine details. Claw-dia Kitty and Dexter Dragon each come complete with a durable carrying tote, storing both the compressor and accessories.

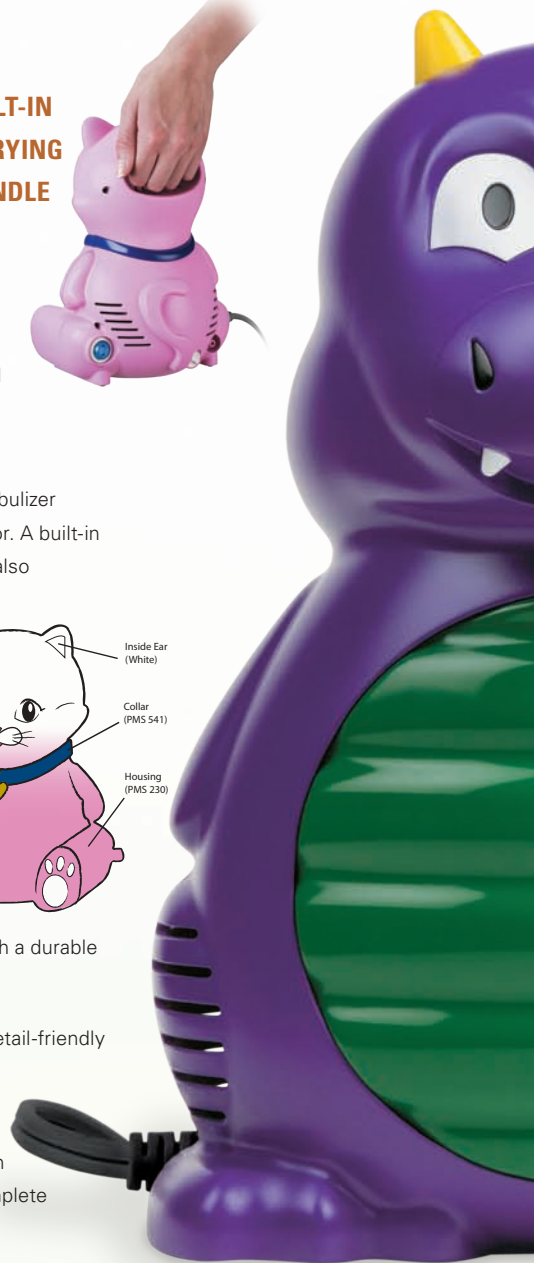

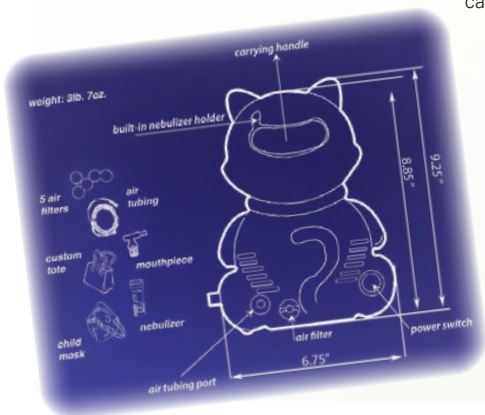

#### HANDS-FREE NEBULIZER HOLDER

Each model ships in our trademark full-color, informative, retail-friendly packaging, complete with bilingual detailed instructions.

We are confident that these appealing characters will help promote patient comfort and help increase compliance with a respiratory medication treatment program, offering a complete therapy package for the smallest of patients.
